for you
calm

save money and fix your maintenance
into your household budget

for you
chill
out

Cars and vans need care...

...and care is a cost.

Think of Menu fixed price maintenance as private healthcare for your vehicle. It brings you total peace of mind and reassurance. It's easy to arrange, it simplifies your budgeting and controls your costs. It's there if you need it. **And when you need it, it can save you money.**

Menu Fixed Price Maintenance is the best way to look after your private car or fleet

It delivers actual savings not additional costs. You choose the level of cover you want including servicing, maintenance, repairs and tyres - separately or combined

Easy to manage maintenance plans for private customers.

Fixed and reduced rates instead of unexpected high price bills. And, because the cost is known and fixed it's easy to budget for - just like a household bill - with low monthly payments and no nasty surprises..

- Savings through our national buying power
- Easy to digest as part of household budget
- Low monthly payments
- All payments collected monthly and protected by the direct debit guarantee scheme
- Manufacturer's warranty maintained
- Cover to meet your individual needs

Car bills can be...

...high cost and unpredictable.

With Menu you get the very best vehicle maintenance and servicing at discounted rates. And, because the cost is known and fixed it's easy to budget for - just like a household bill - with low monthly payments and no nasty surprises

Let Menu Service Network take care of it

A Menu Independent repairer can offer you fixed price maintenance agreements to cover all of your servicing, maintenance, repairs and tyre costs. When work is required, your appointed Menu garage will take care of it. All work covered by your agreement will be completed without further cost to you and Menu Service Network will reimburse the dealer direct.

Simple as that.

Pay less for any work on your vehicle

As an individual motorist you have all the negotiating power of... an individual motorist. With Menu, you benefit from our bulk-buy bargaining.

Our network of independent repairers charge us less than industry-average hourly rates and we pass the savings on to you.

Low monthly payments make easy budgeting

Fixed costs simplify your budget and means you can spread the cost of maintaining your vehicle evenly,

avoiding the horror of being hit with unpredictable or fluctuating bills, that can come at the worst possible time.

As flexible as you want it to be

Menu fixed priced agreements are based on a mileage allowance over a flexible term. You pay a pre-agreed monthly amount and when authorised work is required, a visit to your nominated "home" Menu repairer takes care of everything.

Menu Service Network then reimburse the dealer for the cost of the repairs*.

*Should accident damage of repairs be required that are outside your agreed level of cover or were found to have occurred through lack of fair wear and tear, then these charges would be the responsibility of the customer.

Total peace of mind

We monitor all estimates and requests before approving work to ensure it's both necessary and is done in a timely manner. And we police our network to guarantee the highest standards at all time.

Our professional repairers get a tough boss, but a lot of business so they like it. Our private customers get quality work done for lower than the expected retail price.

A national network of independent garages

Each Menu Service Network garage has been rigorously vetted to ensure you receive exceptional quality service. As part of your agreement, you will be assigned a "home" network garage.

Should you have an emergency outside your local area, you are FREE to visit any Menu network garage across our UK network.

Manufacturer's warranties maintained

New EU regulations allow non-franchised dealers to maintain your car without invalidating the warranty cover. Block Exemption Regulations, or BER, now enable motorists to choose any appropriate garage to service and repair their vehicle.

In October 2003, EU legislation known as "Block Exemption Regulations 1400/2002" or "BER" gave the motorist additional freedom to choose who maintains their vehicles. Before the "BER" ruling, it was extremely difficult to service and maintain vehicles that were covered under the manufacturer's warranty outside of the franchised dealer network without invalidating the warranty cover. The "BER" EU regulation now allows the motorist a choice of any garage to service and repair their vehicle without invalidating the manufacturer's warranty.

All Menu network repairers meet the requirements of "BER" and adhere to the criteria required that ensures your vehicle warranty is maintained.

built especially for you
